

TOWN OF ST. MARYS

Wellington & Victoria Street Reconstruction

MARCH 2024

Road Reconstruction

Project Update

The Town's engineer has finalized the design for reconstruction work on Wellington St. from Park St. to St. Maria St., and Victoria St. from Church St. to Water St.

Road reconstruction companies will have the opportunity to submit a bid in March to complete the work this summer.

An informational video about the project will be posted to www.townofstmarys.com/construction on March 14. The engineer will discuss the project's design and potential impacts.

Enbridge Gas will be replacing a gas main on the west side of Wellington St. starting March 11. The replacement is required before the reconstruction project can begin.

Impacted residents will be contacted directly by Enbridge or their contractor (TW Johnstone) to review the work happening in front of properties. Some residents will have new gas services dug from the street to the gas meter.

Please note that the Town does not control that work and any issues will need to be addressed directly with Enbridge or TW Johnstone.

Project Highlights:

- Road will be reconstructed with a new road base, asphalt, and concrete curb, improving driveway ramps on east side.
- Sidewalk on the west side of Wellington St. will be removed
- Water services will be replaced from the water main to the property line
- Drinking water system redundancy will be enhanced by installing a new connection between Water Street S. and Church St. S
- Sanitary and storm sewer repairs as necessary

Project Duration

An exact construction schedule is not yet available, but the project is expected to be completed by September and the final lift asphalt will be installed in 2025.
